

Boomi Spaces for Software Providers

Enable self-service configuration of integrations for your customers

Boomi Spaces puts the power of integration in your customers' hands. No training required.

Built into the Boomi platform, Spaces enables software providers to extend the power of Boomi to their customers by creating simplified portals where users can interact with templated content.

Spaces provides a central location to manage and publish Boomi integrations for internal or external consumption. It is composed of the Admin Space, where integrations are curated for end users, and the User Space, where integrations can be configured, run/scheduled, and monitored without the need for engineering.

Boomi Spaces provides a standalone, self-service portal for non-technical users.

Extend the Power of Boomi

For You

Empower Your Customers

Ease the burden on Engineering by empowering customers to configure and run curated integrations.

Deliver Integrations that Scale

Deliver one-to-many integrations, manage centrally, and scale to all customers effortlessly.

Faster Time-to-Market

Improve time-to-market by configuring and scheduling integrations in mere minutes.

Central Management

Manage and monitor all customers from a single console.

For Your Customers

Simple to Use

A customer-friendly UI that requires no training or prior integration experience.

Faster Time to Value

Configure, customize, and run integrations in minutes, no experience or professional services required.

Simplified Experience

Curate integrations to provide a simple, self-service experience for any user.

Automatic Updates

Integration updates received automatically with full control over when they are consumed.

Spaces Democratizes Your Integrations

API-First

Boomi Spaces interacts with the platform APIs to enable customization at runtime.

Customer Portals

Built on the Boomi platform ensuring performance and providing a centralized place for monitoring.

Center of Excellence

Create an Integration Center of Excellence that promotes reusability, simplicity, and accelerates your time to value.

FRAMEWORK

Flexibility

The power of the Boomi platform enables endpoint-agnostic integration development. Spaces expands the ability to leverage this flexibility.

Reusability

Build, define, then reuse. Boomi Spaces is powered by hardened templates you create to standardize the way you use the Boomi platform.

Controlled Access

User access is managed through Account Groups and the Account Hierarchy structure. Centralize building and organize consumption with governance.
